AB 66 (Boerner Horvath) – Support
Set for Hearing June 16th

Dear Senator Leyva,

On behalf of the City of Encinitas we are pleased to support AB 66 (Boerner Horvath), a measure relating to coastal resources and research for early warning systems for landslides and erosion, including bluff collapses.

AB 66 would allocate \$2.5 million to UC San Diego to conduct a research study to improve coastal monitoring capabilities and observation necessary for the state's development of a coastal bluff early warning system. The research would be conducted at Beacon's Beach in the City of Encinitas, and in the City of Del Mar.

With the passage of AB 66 and the development of an early warning system, it is our hope that erosions, landslides, and bluff collapses may be better anticipated. It is for this reason we are pleased to support AB 66. Please feel free to contact Jonathan Clay at 916.715.1406 or jclay@jgconsulting.com if you have any questions regarding our support.

Sincerely,

Catherine S. Blakespear
Mayor
